English (Professional)
Afan Oromo (Native)
Amharic

PROFILE SUMMARY

Innovative Software Engineering student specialized in **Digital Public Infrastructure** and AI-integrated agricultural solutions. Proven ability to build functional, scalable systems using Java backend technologies and modern web standards.

EDUCATION

Jimma Institute Of Technology **2022 – 2026**
B.Sc. in Software Engineering Jimma, Ethiopia

- ✓ Specializing in Database Management (DBMS) and Software Design Patterns.
- ✓ Researching the integration of AI in infrastructure-gap solutions.

KEY PROJECTS

Shoraa-Predict Platform **Lead Developer**
AI-Based Agricultural Predictive System **2026**

- Architecting an end-to-end platform providing crop management insights.
- Implemented a robust Node.js backend for secure data persistence.
- Managed documentation including full SRS and PlantUML diagrams.

Professional Web Presence **Full-Stack**
Personal Portfolio & Project Showcase **2026**

- Developed and deployed a responsive developer portfolio via GitHub Pages.
- Optimized directory structures for rapid system load times.

TECHNICAL CONTRIBUTIONS

Database Management Utility
Engineered a reusable Java connection class utilizing JDBC to streamline SQL operations.

Predictive Analytics Modeling
Collaborating on machine learning models to analyze soil health for local farmers.
